

Oral Communication

Exchanging information and understanding through speaking, listening, and non-verbal behaviors.

Teamwork

Interacting with others and building on each other's individual strengths and skills, working toward a common goal.

Critical Thinking

Forming an argument or reaching a conclusion supported with evidence by evaluating, analyzing, and/or synthesizing relevant information.

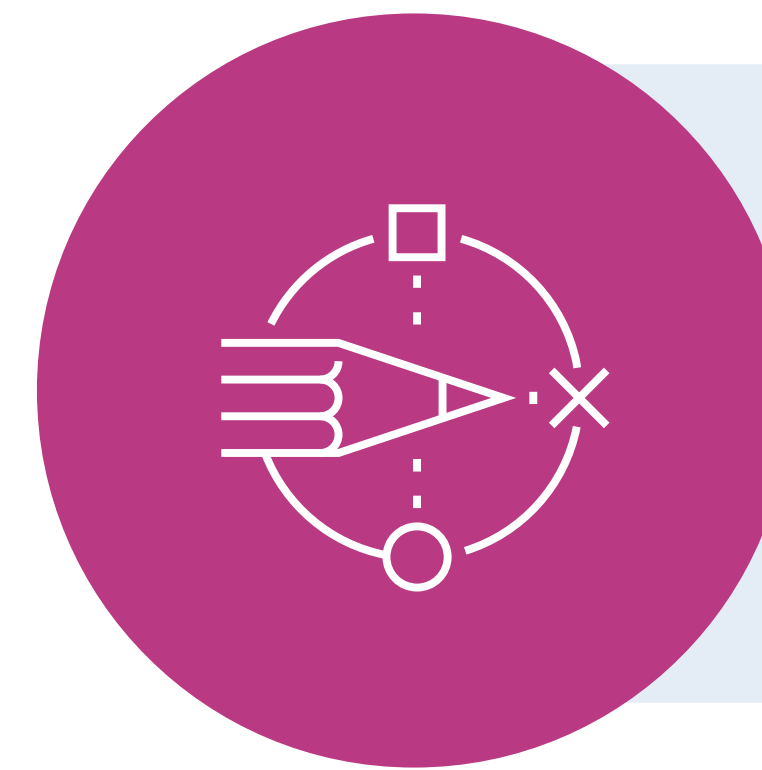

Information Processing

Evaluating, interpreting, manipulating, or transforming information.

Metacognition

Being aware of and able to regulate one's thinking and knowledge.

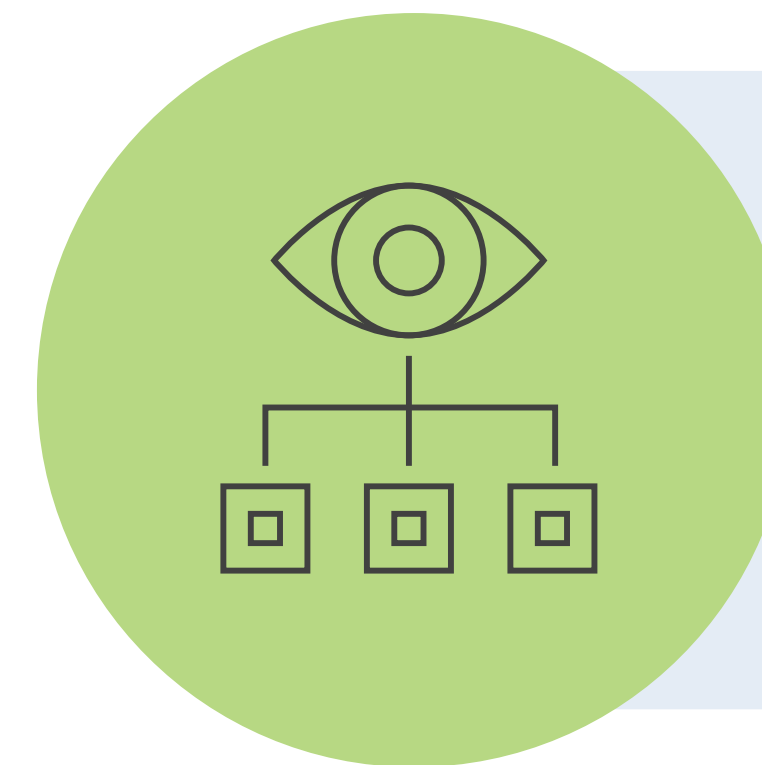

Written Communication

Conveying information and understanding to an intended audience through written materials (paper, electronic, etc).

Problem Solving

Analyzing a complex problem or situation, developing a viable strategy to address it, and executing that strategy (when appropriate).

Management

Planning, organizing, directing, and coordinating one's own and others' efforts to accomplish a goal.

Self + Peer Assessment

Gathering information and reflecting on experiences to improve subsequent learning and performance.

**Learning is a
process + a skill**
